THE

AMERICAN JOURNAL

OF

SCIENCE AND ARTS.

CONDUCTED BY

PROFESSORS B. SILLIMAN AND JAMES D. DANA,

IN CONNECTION WITH

PROFESSORS ASA GRAY, AND WOLCOTT GIBBS,
OF CAMBRIDGE,

AND

PROFESSORS H. A. NEWTON, S. W. JOHNSON,
GEO. J. BRUSH, AND A. E. VERRILL,
OF NEW HAVEN.

SECOND SERIES.

VOL. XLIX.—[WHOLE NUMBER, XCIX.]

Nos. 145, 146, 147.

NEW HAVEN: EDITORS.
1870.

PRINTED BY TUTTLE, MOREHOUSE & TAYLOR, 221 STATE ST.

CONTENTS OF VOLUME XLIX.

NUMBER CXLV.

Page.

ART. I.—Alexander von Humboldt, his early life, his education, his writings and his books; by HENRY STEVENS, . 1

I*.—Livingstone's African Explorations, ... 14

II.—On the relation between the Intensity of Light produced from the combustion of Illuminating Gas and the volume of Gas consumed; by B. SILLIMAN, ... 17

III.—Principles of Molecular and Cosmical Physics; by W. A. NORTON, ... 24

IV.—The Photo-mapper; by HENRY M. PARKHURST, ... 37

V.—On the Crater of Haleakala, Island of Maui, Hawaiian Group; by W. D. ALEXANDER, ... 43

VI.—On a new method of separating Tin from Arsenic, Antimony, and Molybdenum; by FRANK WIGGLESWORTH CLARKE, ... 48

VII.—Notes on the structure of the Crinoidea, Cystidea, and Blastoidea; by E. BILLINGS, ... 51

VIII.—Upon a new Spectroscope, with Contributions to the Spectral Analysis of the Stars; by J. C. F. ZÖLLNER, .. 58

IX.—Polarity and Polycephalism, an essay on Individuality; by H. JAMES CLARK, ... 69

X.—On Laurentian Rocks in Eastern Massachusetts; by T. STERRY HUNT, ... 75

XI.—Contributions to the Chemistry of Common Salt: with particular reference to our home resources; by C. A. GOESSMANN, ... 78

XII.—Account of a fall of Meteoric Stones near Danville, Ala., with an analysis of the same; by J. LAWRENCE SMITH, ... 90

XIII.—Contributions to Zoölogy from the Museum of Yale College. No. V.—Descriptions of Echinoderms and Corals from the Gulf of California; by A. E. VERRILL, .. 93

XIV.—Note on the Generic relations and Synonymy of the Common Sea-urchin of New England (Euryechinus Drobachiensis Verrill); by A. E. VERRILL, ... 101

PAGE.

XV.—On the Early Stages of Brachiopods; by E. S. MORSE, 103

XVI.—On the existence of a Crocodile in Florida; by JEFFRIES WYMAN, ... 105

SCIENTIFIC INTELLIGENCE.

Physics and Chemistry.—On the emission and absorption of heat radiated at low temperatures, MAGNUS, 106.—On the reflection of heat at the surface of fluor-spar and other bodies, MAGNUS, 107.—On the heat of the stars, HUGGINS: On new sulphur salts, SCHNEIDER, 108.—On a new series of crystallized platinum compounds, SCHNEIDER, 109.—Contributions to a knowledge of conjugate bodies in inorganic Chemistry, BLOMSTRAND, 110.

Mineralogy and Geology.—On the Surface Geology of the Basin of the Great Lakes, and the Valley of the Mississippi, J. S. NEWBERRY, 111.—On the Nature and Cause of the Glacial Climate, JOSEPH JOHN MURPHY, 115.—Geological Report of the exploration of the Yellowstone and Missouri Rivers, F. V. HAYDEN, 118. —Mineralogy Illustrated, J. G. v. KURR: Tableau Mineralogique, M. ADAM, 119.

Botany and Zoology.—Botanical Notabilia, 120.—Botanical Necrology for the year 1869: Recent Explorations of the Deep-sea Faunæ, A. E. VERRILL, 129.—Catalogue of the Mammals of Massachusetts; with a Critical Revision of the Species, J. A. ALLEN, 134.

Astronomy.—Report on the recent Eclipse of the Sun, 134.—On the flight of a remarkable meteorite across the Western portion of Ohio near Forest, J. LAWRENCE SMITH, 139.—Elements of Asteroid (109), W. A. ROGERS, 141.

Miscellaneous Bibliography.—Exercises in Practical Chemistry, A. G. VERNON HARCOURT and H. G. MADAN, 141.—On Aniline and its derivatives, a treatise upon the manufacture of Aniline and Aniline Colors, etc., M. REIMANN: A short Course in Qualitative Analysis, with the New Notation, J. M. CRAFTS: The Fruits and Fruit trees of America, A. J. DOWNING, 142.—Agricultural Qualitative and Quantitative Chemical Analysis, G. C. CALDWELL, 143.—Lithologie des Mers de l'ancien monde, par M. DELESSE: Hydraulic Motors, etc., par M. BRESSE: Weisbach's Manual of Mechanics: A Practical Treatise on Metallurgy, adopted from the last German Edition of Kerl's Metallurgy, WILLIAM CROOKES, F.R.S., and ERNST ROHRIG, Ph.D., M. E.: Reliquiæ Aquitanicæ, LARTET & CHRISTY, 144.

Obituary.—Thomas Graham: Axel Joachim Erdmann: O. L. Erdmann: Michael Sars, 144.

NUMBER CXLVI.

PAGE.

ART. XVII.—Photometric Experiments. Part First.—On a simple form of Photometer for determining the amount of Light reflected by Metallic Surfaces at different incidences; by OGDEN N. ROOD, ... 145

Page.

XVIII.—Contributions to the Chemistry of Copper; by T. Sterry Hunt. Part I, ... 153

XIX.—Notice of a recent Land-slide on Mount Passaconaway; by Geo. H. Perkins, ... 158

XX.—On the Silver Mines of Santa Eulalia, State of Chihuahua, Mexico; by James P. Kimball, ... 161

XXI.—Machinery and Processes of the Industrial Arts, and Apparatus of the Exact Sciences; by Frederick A. P. Barnard, ... 175

XXII.—On Norite or Labradorite Rock; by T. Sterry Hunt, ... 180

XXIII.—On the cause of the color of the Water of Lake Leman, Geneva; by Aug. A. Hayes, ... 186

XXIV.—Contributions to Chemistry from the Laboratory of the Lawrence Scientific School. No. IX.—On the Potassio-Cobaltic Nitrite known as Fischer's Salt, and some analogous and related compounds; by Samuel P. Sadtler, ... 189

XXV.—Notice of some Fossil Birds, from the Cretaceous and Tertiary Formations of the United States; by O. C. Marsh, ... 205

XXVI.—Contributions to Zoölogy from the Museum of Yale College. No. VI.—Descriptions of Shells from the Gulf of California; by A. E. Verrill, ... 217

XXVII.—Notice of Dr. Gould's Report on the Trans-Atlantic Longitude, ... 228

XXVIII.—Meteors of November, 1869; compiled by H. A. Newton, ... 244

SCIENTIFIC INTELLIGENCE.

Physics and Chemistry.—On Ammonia-chromium bases, Cleve, 251.—On some new sulphur salts, Schneider, 253.—Synthesis of Hydroxylamin, Lossen: On a new group of double chlorids belonging to the platinum bases, Buckton, 254.—A system of instruction in Quantitative Chemical Analysis, by Dr. C. R. Fresenius, from the last English and German editions, edited by Prof. S. W. Johnson: Effects of the Sun's Heat on a Sand Hill, Geo. Davidson, 255.—On the existence of Ammonium in the Ammoniacal Amalgam, and on a new Test for the presence of Nascent Hydrogen, by Albert H. Gallatin, 256.—On the Existence of an Alloy of Ammonium and Bismuth, and on another new Test for the presence of Nascent Hydrogen, by Albert H. Gallatin, 257.

Mineralogy and Geology.—Preliminary Field Report of the U. S. Geological Survey of Colorado and New Mexico, conducted, under the authority of Hon. J. D. Cox, Secretary of the Interior, by F. V. Hayden, 258.—The Gold Fields and Mineral

Districts of Victoria, etc., by R. Brough Smyth, 263.—On Old Water Courses, by Dr. J. S. Newberry, 267.—The Volcano of Kilauea, and great Earthquake Waves, by Rev. Titus Coan, 269.—A Treatise on Ore Deposits, by Bernhard von Cotta: Notice of Asbestus and Corundum with other Minerals at Pelham, Mass., by J. H. Adams, 271.—Note on the Remains of Fossil Birds, by O. C. Marsh, 272.—The Dinornis and Saurian remains in Australia, by Rev. W. B. Clarke: Synopsis of the Extinct Mammalia of the Cave Formations in the United States, etc., by Edward D. Cope, 273.—The Extinct Mammalian Fauna of Dakota and Nebraska, etc., by Dr. Joseph Leidy, 274.—On the Geology of the New Haven Region, with special reference to the origin of its Topographical features, by James D. Dana: On the Mixture of Cretaceous and Eocene Fossils, by T. A. Conrad: Diamonds in Australia: The Æpyornis of Madagascar, MM. Alp. Milne-Edwards and Alf. Grandidier, 275.—Preliminary Notice of the Lamellibranchiate Shells of the Upper Helderberg, Hamilton and Chemung Groups, by James Hall, 276.

Zoology.—Molluscan Fauna of New Haven, by Geo. H. Perkins, 276.

Astronomy.—Elements of Asteroid (109), by E. H. F. Peters, 277.

Miscellaneous Intelligence.—On Force and Will, by B. A. Gould, 277.—On Auroral appearances and their connection with the phenomena of Terrestrial Magnetism, by Balfour Stewart, 281.—The approach of violent storms announced by telegraph, 282.—The Sars Fund: The Family of the late Prof. Michael Sars, 283.—Lighting Power for Buoys. Premium for the year 1871 offered by the Netherland Society for the Promotion of Industry: Academy of Sciences, Paris, 284.

Obituary.—Rev. George Jones, 284.

Miscellaneous Bibliography.—Transactions of the Chicago Academy of Science, Vol. I, Part II, 1869: Guide to the Study of Insects, by Dr. A. S. Packard, Jr., 285.—Theory of Existence: A Practical Treatise on Metallurgy adapted from the last London Edition of Professor Kerl's Metallurgy, by William Crookes and Ernst Röhrig: Lithology of the Seas of the Old World, by M. Delesse, 286.—"Nature": Paris Universal Exposition, 1867—Reports of the United States Commissioners, 287.

Proceedings of Societies, etc., 288.

NUMBER CXLVII.

PAGE.

Art. XXIX.—On a method of producing, by the Electric Spark, figures similar to those of Lichtenberg; by Eli W. Blake, Jr., ... 289

XXX.—On the Magnesium and Electric Lights, as applied to Photo-Micrography; by J. J. Woodward, ... 294

XXXI.—On a Mechanical Finger for the Microscope, ... 304

XXXII.—The Combinations of Silicon with Alcoholic Radicals; by C. Friedel and J. M. Crafts, ... 307

PAGE

XXXIII.—On the Franklin County Meteoric Iron; and the presence of Cobalt and Lead in Meteoric Irons; by J. LAWRENCE SMITH, ---- 331

XXXIV.—Remarks on the alkalies contained in the mineral Leucite; by J. LAWRENCE SMITH, ---- 335

XXXV.—Examination of a new and extraordinary Gas Well in the State of New York; by HENRY WURTZ, ---- 336

XXXVI.—On Flame Temperatures, in their relations to Composition and Luminosity; by B. SILLIMAN and HENRY WURTZ. First Part, ---- 339

XXXVII.—On the Laurentian and Huronian Series in Nova Scotia and New Brunswick; by HENRY YOULE HIND, . 347

XXXVIII.—Contributions to Chemistry from the Laboratory of the Lawrence Scientific School: No. X.—On certain Double Sulphates of the Cerium group; by C. H. WING, 356

XXXIX.—On a new Aspirator; by JOHN C. DRAPER, ---- 364

XL.—On two peculiar products in the Nickel Manufacture; by JOSEPH WHARTON, ---- 365

XLI.—On the action of sunlight on Sulphurous Acid; by O. LOEW, ---- 368

XLII.—On the formation of Ozone by rapid combustion; by O. LOEW, ---- 369

XLIII.—Contributions to Zoology from the Museum of Yale College. No. 7.—Descriptions of New Corals; by A. E. VERRILL, ---- 370

XLIV.—Contributions to Chemistry from the Laboratory of the Lawrence Scientific School. No. 11; by W. GIBBS, 376

XLV.—On a peculiar form of the discharge between the Poles of the Electrical Machine; by A. W. WRIGHT, .. 381

XLVI.—Movement of the Dome of the Capitol at Washington, during the gale of December 10–12, 1869, ---- 384

SCIENTIFIC INTELLIGENCE.

Physics and Chemistry.—On the heat of combination of boron with chlorine and oxygen, TROOST and HAUTEFEUILLE: On the heat of combination of silicon with chlorine and oxygen, 386.—On some remarkable spectra of compounds of zirconium and the oxyds of uranium, SORBY: On the dissociation of ammoniacal compounds, ISAMBERT, 387.—On a new method for the synthesis of organic acids, BERTHELOT, 388.—On the ethyl compounds of thallium, HANSEN: Spectrum Analysis; by HENRY E. ROSCOE, 389.

Mineralogy and Geology.—On the Megadactylus polyzelus of Hitchcock, E. D. COPE, 390.—On the Elasmosaurus platyurus of Cope, Dr. J. LEIDY, 392.—Orn-

thopsis, a gigantic animal of the Pterodactyle kind from the Wealden, H. G. SEELEY: Volcanic Action on Hawaii. TITUS COAN, 393.—Geological Map of Canada and the Northern United States, Sir W. E. LOGAN, 394.—Labradorite Rocks at Marblehead, T. STERRY HUNT: Explorations in the Rocky Mountains by J. D. WHITNEY, 398.—California Geological Survey: The Geological Survey of Ohio; its Progress in 1869: Sketches of Creation, etc., ALEXANDER WINCHELL: Isomorphism of Gadolinite, Datolite and Euclase, RAMMELSBERG, 400.—Mineralogical contributions of G. VOM RATH: Reale Comitato Geologico d' Italia, 401.—Gibbsite and Wavellite, HERMANN: Hermann on Samarskite and the compounds of the Columbium metals: Minerals of Elba, ANTONIO D'ACHIARDI: Mineralogische Notizen, F. HESSENBERG: Pencatite and Predazzite: Rammelsberg on some native Tantalum and Columbium Compounds, 402.—An Elementary Treatise on Quartz and Opal, etc., GEORGE WILLIAM TRAILL. 403.

Botany and Zoology.—How Crops Feed; a Treatise on the Atmosphere and the Soil as related to the nutrition of Agricultural Plants, with illustrations, SAMUEL W. JOHNSON, 403.—Martius, Flora Brasiliensis, fasc. 48; Convolvulaceæ expos., C. F. MEISSNER: Development of the Flower of Pinguicula vulgaris, etc., A. DICKSON: A Geographical Handbook of all the known Ferns, with Tables to show their distribution, K. M. LYELL: Bulletin of the Torrey Botanical Club, 404.—Notes relating to Vegetable Physiology, etc., 405.—Francis Unger: On deep-sea Dredging in the Neighborhood of the British Isles in 1869, Dr. W. B. CARPENTER, 410.—Secretion of Sulphuric acid by certain Gasteropods, Prof. TROSCHEL, 420.—On the discovery of the sensitiveness to light possessed by Unios, 422.—Report on the Invertebrata of Massachusetts, W. G. BINNEY, 423.—Notes on American Crustacea, No. 3, Ocypodoidea, SIDNEY I. SMITH: Monografia della Famiglia dei Pennatularii, RICHIARDI, 426.—The Butterflies of North America, WM. H. EDWARDS, part 1, 427.

Astronomy.—Elements of Felicitas (109) from observations of the first opposition, WM. A. ROGERS, 428.—On the Periods of certain Meteoric Rings, DANIEL KIRKWOOD, 429.—Abstracts from the Report of the Council of the Royal Astronomical Society, Feb., 1870, 431.—Star-Drift, R. A. PROCTOR, 436.

Miscellaneous Scientific Intelligence.—National Academy of Sciences, 439.—The mean Pressure of the Barometer and the Prevailing Winds over the Globe for the Months and for the Year, 440.—Royal Society of London: Prizes for Comets, 442.—*Obituary.*—Magnus, 442.

Miscellaneous Bibliography.—Hand Book of the Sulphur-Cure as applicable to the Vine disease in America, WILLIAM J. FLAGG, 442.—The Chemical Forces, Heat, Light, Electricity, with their applications: The Life of John James Audubon, 443.—A Physician's Problems, CHARLES ELAM, 444. Proceedings of Societies, 444.—Index, 445.
